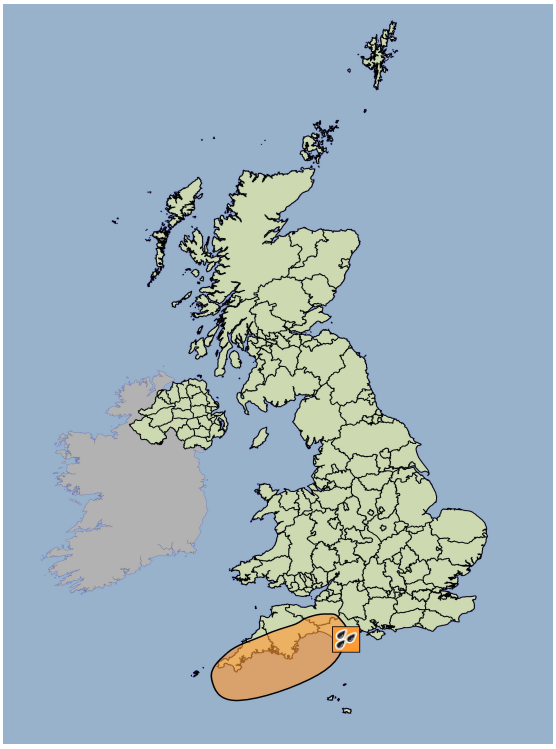
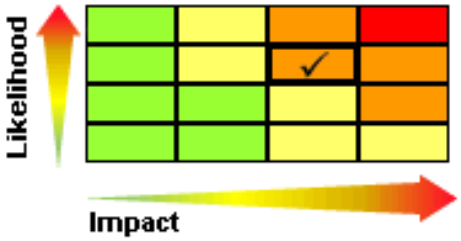
National Severe Weather Warning Service





Chief Forecasters Assessment
Yet another storm is now developing to the west of the Azores. It will run northeastwards across western parts of the UK during Friday and into Saturday, before clearing to the northeast. The associated frontal systems will bring spells of heavy and persistent rain, especially across the southern parts of England and Wales as well as further very strong winds (see separate warnings).

The heaviest rain will affect southwest England during Friday morning, clearing to the east in the afternoon.

The Met Office have issued an **Amber Warning** of **Rain**

Valid from **06:00 on Fri, 14th Feb 2014** until **14:00 on Fri, 14th Feb 2014**

A spell of heavy rain is expected to affect much of Cornwall, south and east Devon, along with parts of Somerset and Dorset during Friday morning, clearing to the east during the afternoon. 15-25 mm of rain will fall widely within the Amber warning area with 40 mm possible in a few places.

The public should be prepared for further disruption due to both surface water and river flooding.

This warning should be viewed alongside the wider Yellow Warning.
